

Backyard Sources

NAME _____

DATE _____

Mosquitoes lay their eggs on standing water. Places that can hold standing water are called **sources**. Circle all of the backyard sources in this picture.

1. How many backyard mosquito sources did you find in this picture? _____
 2. Draw arrows pointing to two places where mosquitoes could enter the house.
- When you get home, check your own backyard (or area around where you live) for mosquitoes.
3. How many sources did you find in your own backyard that could hold water? _____
 4. How many sources were holding water? _____
 5. How many sources had water and mosquito larvae or pupae? _____
 6. What should you do if you find mosquito larvae? _____
 7. On the back of this paper, draw a map of your backyard and include all mosquito sources.
