

Life Cycle Memory Game

TEACHER'S COPY

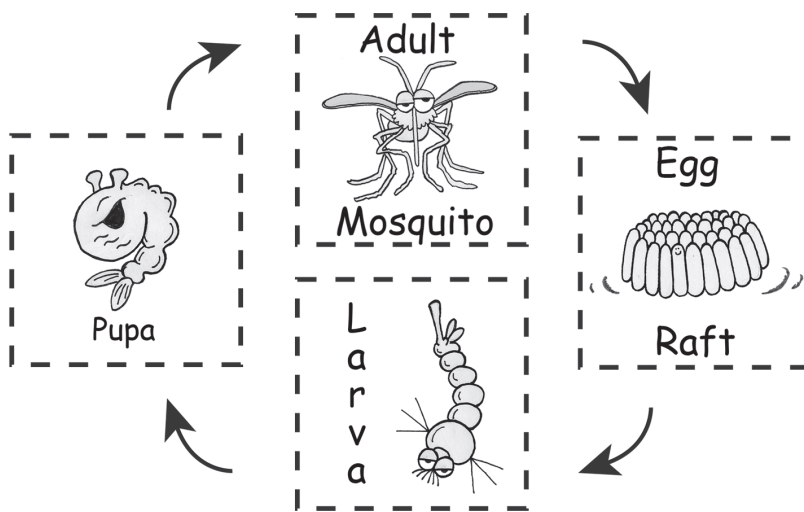

Directions:

1. Use scissors to cut out all of the pictures.
2. Find a partner who also has a set of pictures.
3. Use both sets to play Memory (if you don't know how, ask your teacher).

For this activity, students will need scissors to cut out the playing cards.

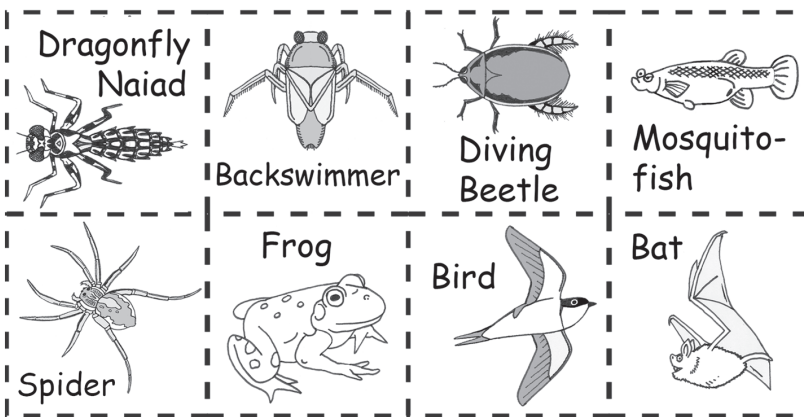

Rules for memory game: Students pair up so that together, they have 2 copies of each card. Students place all of the cards randomly face-down. Students take turns flipping over two cards. If the cards match, the student keeps that pair, and that student continues until he/she flips two cards that do not match. The goal of the game is to get as many pairs of cards as possible.

Mosquito Life Cycle

Grade 2 Life Sciences
 "Plants and animals have predictable life cycles."

Animals that eat mosquitoes (predators)

Grade 1 Life Sciences
 "Students know animals eat plants or other animals for food..."
